WHAT PESTPING DOES

Appointment reminders

A text the day before each job. Customers confirm or reschedule with one reply.

Fewer empty driveways.

Review requests

A friendly ask for a Google review a couple of hours after the job is done.

More 5-star proof, on autopilot.

Missed-call text-back

Miss a call and the caller gets a text right away, before they try the next company.

Win the job you used to lose.

WHAT YOUR CUSTOMERS SEE

Green Valley Pest Control
Text message

MISSED-CALL TEXT-BACK

Sorry we missed your call! This is Green Valley Pest Control. How can we help?

REMINDER

Hi Sarah! Your quarterly treatment is tomorrow at 10:00 AM. Reply C to confirm or R to reschedule.

C, see you then!

REVIEW REQUEST

Thanks for choosing us, Sarah! Mind leaving a quick Google review? It really helps.

Example messages. We write yours with you.

HOW IT WORKS

Three steps. Almost nothing for you to do.

1. **Fill one short form**
   Your hours, your Google review link, the basics.
2. **We set everything up**
   We connect your software and write your texts. You approve every one.
3. **It runs by itself**
   Nothing to manage. You get a short monthly summary of the results.

How long until it's live? Most of the work is on our side. The main wait is carrier approval for your business texting number, from a few days to a couple of weeks. We handle the paperwork and switch you on the day it clears, and your free 2 weeks start that same day.

Your first 2 weeks are free. Just reply to the email.

PestPing

pestping.com · hello@pestping.com

Built for pest control owners, run for you.

WHY OWNERS PICK PESTPING

We do the setup, not you

Most texting tools are software you have to learn and run yourself. With PestPing there is nothing technical on your side.

Built only for pest control

Quarterly treatments, callbacks, seasonal pests. The texts sound like a pest company, because they are written for one.

You approve every text

We write the messages with you. Nothing goes to a customer until you have said yes.

Smart safeguards built in

Quiet hours, instant STOP opt-outs, a review cooldown, and job types that never trigger a review request.

Works with your software Briostack · ready now · Jobber · Housecall Pro · FieldRoutes · PestPac · GorillaDesk

On Briostack we can start right away. Using something else? We build the connection for you and tell you the timing up front.
